Views 4 upls	
· create a new file tivis-Py in you	X
app's directory.	
· import these two e 粗容.	
- from django. Urls import pa	th
- from a import views	
1-963: 81 11 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	····
Now create your URL's here;	
like for e-89	
Uripatterne 2 C	
nath [! Views. home, name = home').	
path ('', views. home, name = 'home'), path ('800m/, views. 800m, name = 1800m)),
ACOUNT TO A THE TOTAL AND A COUNTY OF	
	7
these are your app upt's now also add	
the into mour project's upl's file	-
these are your app bles not this into your project's vici's file this into your project's vici's file path (" include (base.vris'))	
path (", Incide ()
